

AMERICA'S NUCLEAR STORAGE PLAN WITHOUT YUCCA MOUNTAIN...

121 nuclear waste storage sites in 39 states for over a 100 years!

The U.S. Department of Energy is seeking to unilaterally abandon \$10 billion of progress made over the past 27 years and kill the proposed national storage repository at Yucca Mountain, Nevada, now under review by the U.S. Nuclear Regulatory Commission. This action could result in 121 sites in 39 states storing nuclear materials for a hundred years or more, while creating a roadblock to new clean nuclear energy plants and costing taxpayers tens of billions of additional dollars.

**Support nuclear energy.
Don't pull the plug on Yucca Mountain.**
